SUMMARY

Computer Science undergraduate with a strong foundation in Data Structures, Algorithms, and Object-Oriented Programming, and hands-on experience building full-stack applications with React.js, Node.js, Express.js, and PostgreSQL. Developed a bus pass management system with automation-driven approval workflows, cutting administrative processing time by 60%. Integrated LLM-based APIs (Google Gemini) into a production-style application for AI-driven analysis. Comfortable across the stack, from algorithmic problem-solving to REST API design, database modeling, and scalable system architecture.

EDUCATION

B.Tech in Computer Science Engineering 06/2023 – 06/2027

Jain University, Bangalore, India

CGPA: 8.37

PROFESSIONAL EXPERIENCE

Full Stack Developer Intern, Infotact Solutions 05/2025 – 07/2025

Bangalore, India

- Engineered 5+ reusable React.js components, reducing frontend development time by 20%.
- Developed and tested 8+ RESTful APIs using Node.js and Express.js, powering core app features.
- Optimized frontend performance, cutting page load time by 30%.
- Streamlined CI/CD workflows, reducing deployment time by 25%.

PROJECTS

RoleLens – AI-Powered Resume Screening Platform 01/2026 – Present

- Built a full-stack web application using React, TypeScript, Node.js, Express.js, and PostgreSQL (Supabase).
- Integrated Google Gemini API to deliver AI-driven resume scoring, skill-gap analysis, and career recommendations.
- Implemented JWT-based authentication and row-level security (RLS) policies for secure, scoped data access.
- Designed REST APIs for resume parsing, AI analysis, and history retrieval, supporting PDF and DOCX formats.
- GitHub

Phishing Tracker – Chrome Extension 03/2026 – Present

- Created a Chrome extension using TypeScript for real-time phishing and threat detection.
- Combined the Google Safe Browsing API with custom local heuristics to classify website safety.
- Configured background scripts for continuous tab monitoring and a popup dashboard for scan results and threat history.
- GitHub

Fitness & Nutrition Management App – SIH Hackathon 06/2025 – 08/2025

- Delivered a full-stack fitness and nutrition tracking platform using React.js, Node.js, and Express.js.
- Leveraged Firebase Authentication and Firestore for secure user management and meal logging.
- Built an AI-powered chatbot for personalized fitness and nutrition recommendations.
- Designed REST APIs for macro tracking, meal logging, and nutrition analytics.
- GitHub

College Bus Pass Management System 01/2025 – 03/2025

- Architected a role-based bus pass management platform using React.js and Firebase for students and administrators.
- Implemented secure authentication and Firestore-based CRUD workflows for application processing.
- Streamlined approval workflows, reducing manual processing time by 60%.
- GitHub

TECHNICAL SKILLS

Programming Languages: Java, JavaScript, TypeScript, Python (Basics), SQL

Core CS Concepts: Data Structures, Algorithms, Object-Oriented Programming, System Design Basics

Libraries and Frameworks: React.js, Node.js, Express.js, Firebase

Developer Tools: Git, GitHub, Vercel, MongoDB, MySQL, PostgreSQL

Relevant Coursework: Data Structures and Algorithms, Full Stack Development, REST API Development, Database Management Systems, Object-Oriented Programming, Agile Software Development

ACHIEVEMENTS

Top 10 Team – Hack4Change Hackathon

Finalist – Buildverse Hackathon (Campus Reporting Portal)

Participant – Smart India Hackathon (SIH)
